

Availability of Plenum-rated 96- and 144-fiber Tight Buffered Distribution Cables.

Superior Essex announces the availability of plenum-rated 96- and 144-fiber tight buffered distribution cables. Its proprietary fluoropolymer jacket makes the cable resistant to mechanical abrasion, chemicals, and oils. Fully compliant to ANSI/ICEA S-83-596, the cable meets all tensile loading and operational temperature requirements for indoor applications while its plenum rating allows the cables to be placed in both riser and plenum spaces.

The cable is available in all fiber types including Bend Insensitive single mode fiber and Laser Optimized 50 micron 10G/550 multimode fiber which is OM4 compliant. Both of these fibers are 40/100GB Ethernet ready.
